

TRINITY UNIVERSITY.

The university opens not only with a larger attendance than heretofore but with a much more representative body of students from every part of the territory.

The university gynasium is to be equipped with bats and lockers and is under the direction of a competent superintendent formerly at John Hopkins university, who will adapt the work to the individual deficiencies of the students and will make careful plans of physical measurements for future comparison.

A laboratory of Bacteriology and Pathology under the immediate direction of Mr. John Weisheit, late of The University of Wisconsin, is among the new features at the territorial university.

The library of the university has recently received large accession by gift from the Geological Survey of Minnesota and the laboratories of Denison University.

The rumor is about that the language department of the university under the able direction of Professor Paxton has so increased in number that the modern languages will at once be separated and transferred to an independent institution.

The business department is unusually well patronized this year and Professor Parsons is exceedingly busy in effecting the organization.

The Normal department, in spite of the increase in work required, has doubled in attendance and Professor Hodgkin is enthusiastically entering upon the task of organization.

Professor Thielot is at work unpacking the large order of apparatus just received by the department of Physics.

Professors Taylor and Hodgkin are strengthening the English work by additional work in orthography and advanced history.

The Spanish department is one of the most acceptable features of the university under the able management of Mr. Montoya.

LADIES! Will leave for Albuquerque on Sept. 30. Those wishing Yale remedies will please call in the meantime. Miss Wyatt, special agent.

Was taken with the grippe and tried all the physicians for miles about, but of no avail and was given up and told I could not live.
